

# Visual Classification of Training Data

By: Jeffrey Clark and Tamina Matti

The following documents presents snapshots of each subroad in our training dataset. The images to the left are composites from 2020-05-01 to 2020-07-31, the middle images are composites from 2021-05-01 to 2021-07-31. The right-most images are differenced composites, where bright elements indicate elements present in the latter (middle) composites, but not in the former. The subroad of interest always runs through the center of each image.
